

The Front Line of Innovation

i²Teller provides greater productivity and cost savings by empowering your tellers to immediately verify transactions at the teller line, thus improving transaction accuracy rates and fewer exception items, adjustments and customer notifications.

Features & Benefits

You no longer need pre-encoded cash in/out tickets, deposit slips, general ledger, preprinted customer receipts or miscellaneous counter slips. i²Teller creates these tickets virtually during the transaction and automatically adds cash in/out details to the face of the virtual ticket. Tellers can easily input transaction comments, details, or member identification data to the virtual ticket.
